

Memo from To: Tibby Russell
JOSHUA LEDERBERG Burke Judd

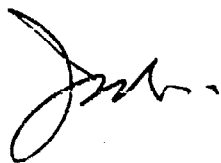

Genetics Society statement

I think the STATEMENT is excellent, and I would be glad to attach my signature to it as a personal statement of belief, or in company with other NAMED individuals.

I believe that a group statement which invokes the Society in any way is the wrong PROCEDURE.

(I have been somewhat reinforced on this issue by having rediscovered some of my old correspondence concerning what was perhaps the first venture of the Society into this territory. In fact, if either of you have the archives, and could retrieve what the Society sent out in '50-52 as various statements in connection with the election of the committee at that time, I would be grateful to have those for my own records.

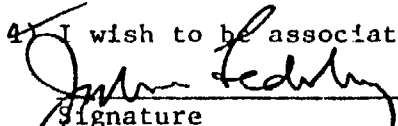

Thank you,

PROFESSOR JOSHUA LEDERBERG
Department of Genetics
School of Medicine
Stanford University
Stanford, California 94305

PREAMBLE; STATEMENT OF GSA MEMBERS ON HEREDITY, RACE, AND IQ;
IMPLICATIONS FOR SOCIETY; THE ROLE OF GENETICISTS. JAN. 1976.
